

## BEHAVIOURAL ANALYSIS

Investigative Solutions Network (ISN) offers a comprehensive suite of Behavioral Analysis tools and the expertise to examine and interpret individuals' or groups' behavioral patterns. Our team assesses behaviours to identify potential threats, risks, and vulnerabilities that may jeopardize the safety, security, or well-being of clients' organizations. By proactively identifying and mitigating risks, ISN assists in the development of targeted security measures and intervention strategies to safeguard people and assets.

### **Polygraphs**

Enhance the credibility and integrity of your investigative processes with our Polygraph services. Our skilled and certified examiners employ state-of-the-art technology to deliver accurate and reliable results, ensuring a trustworthy foundation for your decision-making.

- Criminal/Legal Investigations: Validate the accuracy of statements and witnesses.
- Pre-Employment Integrity Checks: Screen potential hires. (Outside of Ontario and New Brunswick)
- Corporate Security: Address internal concerns such as theft, fraud, and corporate espionage.
- Conflict Resolution: Verify the truthfulness of statements in relationship matters.
- Therapeutic Contexts: To support individuals in areas such as addiction treatment, facilitating honest self-disclosure.

### **Violence/Threat Risk Assessment**

Our expert analysts employ comprehensive methodologies to identify and mitigate potential risks of targeted violence posed by individuals, empowering you to make informed decisions and safeguard what matters most: the people you care about!

- Identify the difference between those who make threats vs. those who pose risk.
- Enact mitigation strategies to reduce risk for targeted violence.
- Institute risk reducing strategies to enhance safety in the future.

### **AI Voice Analytics**

Transform your approach to Security and Risk Assessment. With our AI-enabled technology in place, you will accurately identify the risks. Through the use of automated questionnaires, our process delivers objective and unbiased risk alerts, in any language and without any additional data.

- Identify high risk behaviour.
- Speed up clearance process.
- Defend against insider threats.
- Protect people & operations.

**Best People. Best Methods. Best Results.**
